

Terraform Venus

Terraform Venus

1/3

The base technologies requires significant society research to unlock and each terraforming project requires significant investments of Energy and time.. 'Why has Venus's atmosphere not been stripped away by solar wind?' Tells us that even though Venus has no magnetic field, it does have an ionosphere generated by the interaction between solar wind and the thick atmosphere.. In 'Can Venus be made habitable?' We see that Venus's atmosphere would have to be substantially altered in order to terraform Venus.
